

UPGRADE PACKAGE

Installation & Fit Guide · 32.5KG & 41.5KG

SKU SECUP325 / SECUP415 assassingoods.com

TOOL: SUPPLIED ALLEN KEY

HOW TO UPGRADE Kit: 2× base · 2× plate set

**1****DIAL DOWN TO 4KG**

Turn the dial on both handles to the lowest setting (4KG) before you remove anything.

2**EMPTY THE BASE**

Lift the handle out and take every plate out of the original base.

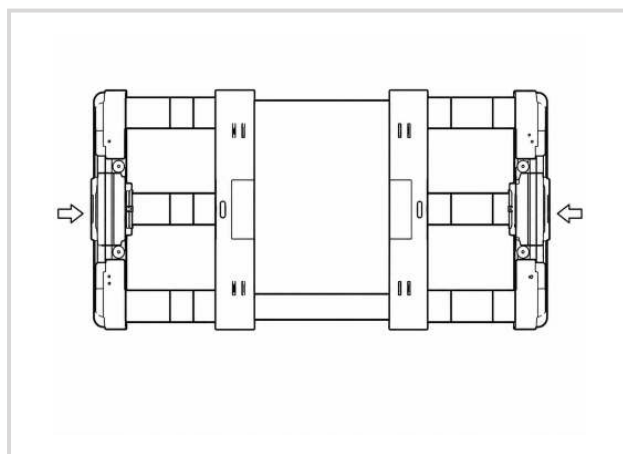

3**RESEAT THE END PLATES**

Start from the outside: fit your original end plates into the edges of the new base.

4**SLOT THE NEW PLATES IN**

Fit the new upgrade plates into the space working inwards until the base is full.

HOW TO ADJUST THE FIT

**IF IT'S TOO TIGHT**

When the handle won't seat easily in the base, use the allen key to **loosen** the bolt on the adjusters (highlighted) until it slides in cleanly.

IF THERE'S TOO MUCH PLAY

When the handle sits loose in the base, use the allen key to **tighten** the adjuster bolt to lock it in for maximum performance.
